

CXS Silicone Markers

CXS type markers are permanent non-shrinkable printed silicone sleeves forming part of Cabletec's MAM range of identification products. CXS markers are available in two grades, FA a highly flame retarded marker and LFH a flame retarded zero halogen marker. CXS markers are manufactured from silicone rubber and as such have excellent resistance to a wide range of organic chemicals, ozone and UV. CXS markers are used in exceptionally demanding applications such as military, aerospace and rail.

Technical Characteristics

Continuous operating temperature	CXS/FA -65°C to +200°C
	CXS/LFH -65°C to +200°C
Application	Push on or expansion tool

Part Numbering System

CXS/XX- (Dia) x (W) x (L) (Colour) (M)

Example

CXS/LFH-3.0x0.5x25YW(M) =

Zero-halogen, 3.0mm diameter, 0.5mm wall thickness, 25mm sleeve length, yellow printed to customer's specification

Availability

Standard colours: Yellow (YW), White (WE), Red (RD), Blue (BE)

Specifications: CXS-LFH - London Underground Approved

FULL PRINTING AND KITTING SERVICE AVAILABLE
